

 **open access**

JoCTEC is an **open access journal** meaning that all content is freely available without charge to the user or their institution. Users are allowed to read, download, copy, distribute, print, search, or link to the full texts of the articles, or use them for any other lawful purpose, without asking prior permission from the publisher or the author.

Open access is an ongoing publication practice that differs from the traditional manner academic journals are published and then received by the reading public. In Open Access publication model neither readers nor a reader's institution are charged for access to articles or other resources. We ask that users in turn give proper citation of the original publication or link to the full texts of these articles for any non-commercial purposes. A subscription to the journal in which these articles are published is not required.

Editor's Note

It is with great pleasure that we bring you the latest issue of the Journal of Communication Technology. We would like to graciously thank those who have led us to this point. Thank you to our founders Jacob Groshek, Homero Gil de Zuniga, and Marcus Messner, and many others including James Ivory, Cory Robinson, Pamela Brubaker, and Lee Hair.

The last three months have seen a great deal of changes here on the editorial board, and I am proud to see all of our hard work come to fruition with this first publication of our new team. Dr. Linwan Wu and Dr. Cindy Vincent have been so integral in making our vision for the journal come true. But we are unsatisfied with the progress we've made so far, and you will see even more changes for the better moving forward. We thank you again for reading this latest issue of JoCTEC and we look forward to providing an open source double blind peer reviewed journal that will serve as a platform for academics and scholarship that fits our core mission, to showcase research that explores the connections between communication and technology, and the social role these media technologies play in virtually all forms of mediated communication.

Thank you again, and enjoy reading.

Dr. Theo Plothe

Editor, Journal of Communication Technology
Division of Communication Technology, AEJMC
